

Full Stack Developer

Job Summary:

We are seeking a skilled and motivated Full Stack Developer with 5–7 years of experience in building scalable web applications. The ideal candidate will have strong expertise in Node.js, TypeScript, and React, along with hands-on experience in AWS cloud services. You will be responsible for developing end-to-end solutions, collaborating with cross-functional teams, and contributing to high-quality product delivery.

Job Responsibilities:

- Develop and maintain full-stack applications using JavaScript/TypeScript, Node.js, and React
 - Design and build scalable backend services and RESTful APIs
 - Work with AWS services such as Lambda, DynamoDB, Aurora, SQS, and IoT Core
 - Collaborate with technical leads and senior engineers to implement robust system designs
 - Participate in Agile processes including sprint planning, daily stand-ups, and retrospectives
 - Work closely with product owners, UX designers, and QA teams to deliver high-quality features
 - Write clean, efficient, and maintainable code following best practices
 - Conduct and participate in code reviews to ensure code quality and consistency
 - Contribute to CI/CD pipelines using tools like AWS CodePipeline and CloudFormation
 - Ensure application security by adhering to industry best practices (e.g., OWASP standards)
 - Integrate external systems via REST APIs
 - Troubleshoot, debug, and optimize application performance and reliability
-

Required Skills:

- 5–7 years of professional experience in software development
- Strong experience with Node.js, TypeScript, and React
- Hands-on experience with AWS cloud services and serverless architecture

- Solid understanding of REST API design and integration
 - Experience with relational and/or NoSQL databases such as PostgreSQL or DynamoDB
 - Familiarity with Git-based version control and CI/CD practices
 - Understanding of microservices or serverless architecture patterns
 - Strong analytical and problem-solving skills
 - Good communication and collaboration abilities
 - Bachelor's degree in Computer Science, Engineering, or a related field
-

Nice to Have:

- Experience with Python development.
 - Exposure to IoT systems or event-driven architectures.
 - Familiarity with cloud monitoring and logging tools.
-

What we Offer:

- Opportunity to work on cutting-edge cloud-based applications.
- Collaborative and growth-oriented work environment.
- Exposure to modern technologies and best development practices.

If you're someone who enjoys interacting with people, is curious about technology, and wants to build a career in sales, we'd love to hear from you.
